Student Registration Instructions for MindTap within NYU Classes

1. Before launching into MindTap or registering your access code it is advised that you do a “systems check” to make sure your computer is optimized for using this resource in terms of browser, JavaScript, cookies, Flash, and popups. Your instructor may have provided a link within Sakai to this but if not below is the URL for that. Click on it address any issues before moving forward (indicated by a red circle with a white exclamation point inside of it). If you get all white checkmarks in green circles, then you are good to go:

2. Login to your NYU Classes access at
   https://shibboleth.nyu.edu/idp/profile/SAML2/Unsolicited/SSO?execution=e2s1
3. Click on your course in NYU Classes:
4. Click on the “Art Through the Ages” tool on the left hand side:

This will load in a new window. Make sure your popup blocker isn't blocking it, though it shouldn't if your systems check was successful (see step 1). You will be provided with three options:

Here are what these options are:
a. Pay online – if you so choose you can purchase access to the MindTap w/ebook directly through a secure check out, after doing this your access would be instantaneous into the resource:

![Secure Checkout Image]

b. Redeem Access Code – If you choose this option, you will simply be prompted to enter the access code you purchased at the bookstore (as part of a bundle or standalone) or through the online shop front cengagebrain.com (if you chose to do the later, make sure you purchase a code that is indicated to be a “General Mindlink Instant Access Code”):

![Redeem Access Code Image]

c. Go to my course – You may enter directly into the MindTap for a grace period, the expiration time of which is indicated on this screen. At the end of this grace period you will be prompted to either “Pay online” or “Redeem Access Code.” All your scores and course activity will be saved during this period:
5. After doing one of these options, you'll be taken into MindTap (once again be mindful of popups which may be blocked). You'll first be prompted to agree to the MindTap Service Agreement. Scroll down and click “Accept” on the bottom “left”:

6. Click enter on the next page indicating your MindTap Course:
7. And from there you should have access to MindTap or to the specific resource within MindTap that you clicked the link for.

*NOTE – If you have technical issues, your instructor may have provided a tech support link for MindTap within NYU Classes. If not, you may file a ticket directly at www.cengage.com/support. After filing a ticket you'll be provided with a phone number to call into if you should so want. Otherwise, you'll be contacted via email to resolve your issue. You can check the status of your tech support case at the aforementioned site.
